# **Product Datasheet**

Product Name Actin-Like 6A Human Recombinant

Cata No CB501000

Source Escherichia Coli.

Synonyms Actin-like protein 6A, 53 kDa BRG1-associated factor A, Actin-related protein Baf53a,

ArpNbeta, ACTL6A, ACTL6, BAF53A, MGC5382.

### **Description**

The ARPs are involved in diverse cellular processes, including vesicular transport, spindle orientation, nuclear migration and chromatin remodeling. This gene encodes a 53 kDa subunit protein of the BAF (BRG1/brm-associated factor) complex in mammals, which is functionally related to SWI/SNF complex in S. cerevisiae and Drosophila; the latter is thought to facilitate transcriptional activation of specific genes by antagonizing chromatin-mediated transcriptional repression. Together with beta-actin, it is required for maximal ATPase activity of BRG1, and for the association of the BAF complex with chromatin/matrix.

Actin-Like 6A Human Recombinant produced in E.Coli is a non-glycosylated, polypeptide chain containing 430 (1-429) amino acids and having a total molecular mass of 49.3 kda.

ACTL6A contains T7 tag at N-terminus and is purified by proprietary chromatographic techniques.

## **Physical Appearance**

Sterile Filtered clear solution.

#### **Formulation**

Actin Like 6A at a concentration of 0.1mg/ml in 50mM Tris-Acetate, pH7.5, 1mM EDTA, 20% Glycerol.

#### **Stability**

ACTL6A although stable at 4℃ for 1 week, should be stored desiccated below -18℃.

For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA).

Please prevent freeze-thaw cycles.

#### **Applications**

- ELISA
- Inhibition Assays
- Western Blotting
